**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election with traverse of claims 1-15 in Paper No. 3 is acknowledged.

The traversal is on the ground(s) that there is no burden upon the examiner. This is not found persuasive because of their recognized divergent subject matter; see Paper No. 2.

The requirement is still deemed proper and is therefore made FINAL.

2. This application contains claims 16-22 drawn to an invention nonelected with traverse in Paper No. 2. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Schell et al. (US 5,738,177).

Schell et al. disclose a production assembly tool comprising a first structure 34 and a second structure 18, the first structure having a overmold portion 14 and structural portion 12. The overmold portion 14 is made from a resilient

Art Unit: 3721

material/elastomer (neoprene rubber) and contacts the second structure 42 effectively dampening vibrations and stresses; see figures (1B and 19). Schell et al. disclose bumper member 76 for abutting the second structure 18 and limiting movement. Linking members 86 link the bumper 76 and overmold 14.

5. Alternatively, claims 1 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Milkovich et al. (US 6,100,114).

Milkovich et al. disclose an article with a first structure 48 and a second structure 42, the first structure having a overmold portion 48 and structural portion 18. The overmold portion 48 is made from a resilient material and contacts the second structure 42 effectively dampening vibrations and stresses.

### ***Response to Arguments***

6. Applicant's arguments filed 8/23/02 have been fully considered but they are not persuasive.

Regarding Schell, the first structure/overmold portion 14 is made from a resilient material/elastomer (neoprene rubber) and contacts the second structure 42 effectively dampening vibrations and stresses between structure 12; see figures (1B and 19).

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., decoupling sensor, membrane switch) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the

specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Regarding Millkovich, encapsulent material is considered an overmold portion.

### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
